## **PRODUCT DEVELOPMENT**

**COMPETITION** was one of the FOODQA project activities that were held on December 9, 2019, at Jordan University of Science and Technology. This competition aimed to unleash the talent of students to improve

the nutritional value of Jordanian traditional foods using functional foods. The outcomes of this competition reflected the students' knowledge, skills, and teamwork capacity in this field.

## Fostering Academia-Industry Collaboration in Food Safety and Quality- FOODQA

Erasmus plus office at Jordan University of Science and Technology under the supervision of Prof. Fahmi Abu Al-Rub & Dr. Hana Al-Khalidy decided the who will move to the next stage based on the competition conditions.

20 Teams moved to the next stage from different partners organizations like Jordan University of Science and Technology, University of Jordan, Jerash University & Al-Balqa' Applied University.

the judges were from different institutions like Jordan Food & Drug Administration JFDA represented by Dr. Amjad Haymour & Eng. Safaa Smadi, Nabil company represented by Eng. Zaid Abu Shihab, Al Kaseeh Company & Jordan Co For Antibody Production MONOJO

represented by Dr. Penelope Shihab.

There were 4 teams who won the competition from JUST and they were rewarded with special training at one of the Italian universities that is located in Teramo city for two weeks.

This activity was one of its kind and we thank all of the partners who helped us during this event and we especially thank Teramo University represented by Dr. Josipa and her team for preparing a special training program for the winners.
